

# MOUSSE<sup>®</sup> BALLS

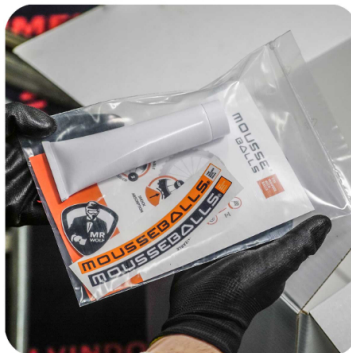

THE  
MOUSSE  
WITH  
BALLS

## Fitting Instructions

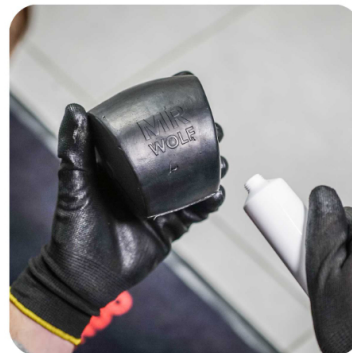

The package include:

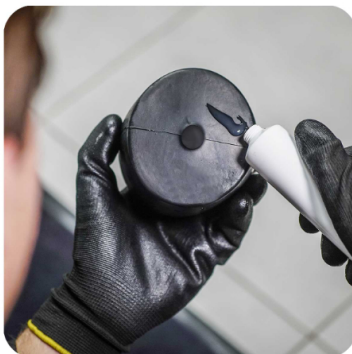

- > A complete set of MousseBalls of the chosen size
- > Assembly instructions

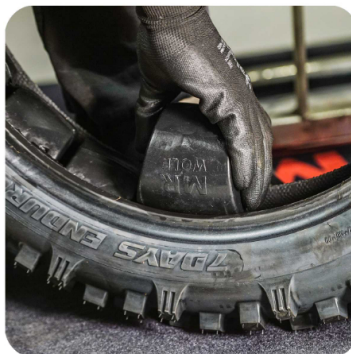

- > A silicone lubricant kit
- > A rim sticker kit + a MrWolf sticker

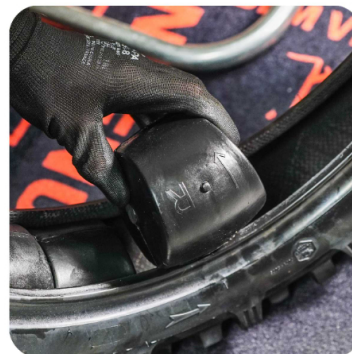

Lubricate each Ball individually using the supplied grease

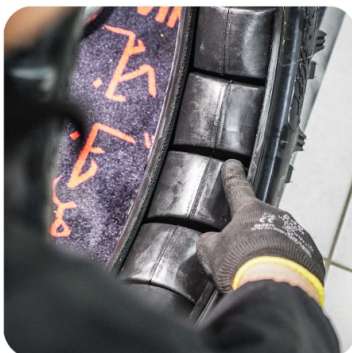

**Warning:** Lubricate also the lateral surfaces of the Balls

Insert the Balls inside the tire

**Warning:** Keep the arrow oriented towards the rim

In intermediate configurations it will be normal to have empty spaces between one insert and another (about 1-2 cm / 0,4-0,7 inch)

Arrange the Balls evenly so as to have equal spaces along the entire circumference

Warning: the Balls will swell more than 200%

If you wish to have a more sustained configuration (eg for Rallies), compress the Balls against each other

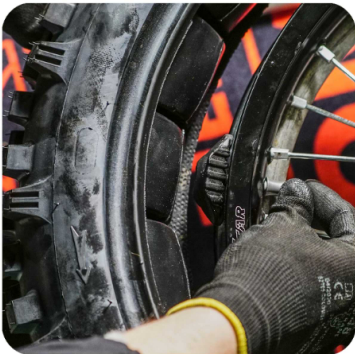

Add one or two extra Balls

Warning: the balls will swell by more than 30% during use by zeroing the space between one insert and another

Then proceed with fitting the tire

Warning: Rim Lock must be at the centre of a Ball

The game is done!

Consult the Setting Table provided to understand all the possible configurations for your tire
